Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 39-41, drawn to a method of transferring data to potential customers over the Internet, classified in class 705, subclass 27.
- II. Claims 44-82, drawn to an electric vehicle and AC bus assembly, classified in class 701, subclass 22.

The inventions are distinct, each from the other because of the following reasons:

Invention II is distinct from Invention I because it is directed towards a method of transferring data to potential customers over the Internet, and does not require the particulars of Invention I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
